

# American bit

The Americas' digital gold

[americanbit.tech](http://americanbit.tech)

**AMERICAN bit**

## Initial appreciation to you

Thank you for taking your time to read our whitepaper. We hope the information presented here will allow you to understand the potential of the currency.

## Disclaimer of Liability

This whitepaper is for informational purposes only. Its content is not a promotion for the sale or offer of securities or financial securities, much less gives any right over any company that is subsidized under the protection of the creator of these "American bit" tokens. Read the document carefully to understand all the processes.

Potential tokens buyers must carefully evaluate the risks and uncertainties associated with digital tokens trading, as well as familiarize themselves with all the information contained in this document before closing any deal.

## Digital Currency

Any and all digital currency, being fiduciary or deposited / distributed over a blockchain technology, works to send values from point A to point B. Those transactions that occur between two parties without the need of intermediation of a trusted third party are the so-called transactions P2P (peer-to-peer), which in this case can't be fiduciary currencies, since these depend on the trust that the market places in a particular government. On the other hand, those coins that use a blockchain to write and validate your transactions are the cryptographic currencies, such as bitcoin, ether, waves, litecoin and american bit .....

## Digital Currency - American bit (AMERI)

American bit (AMERI) is a P2P currency that passes over the Waves Platform blockchain ([wavesplatform.com/](http://wavesplatform.com/)).

- Created, without the possibility of issuing more units;
- Token/currency ID → B1vTbE9oAJrmdBcwwuybSDE1TmkZHCuFNNvNwiaMEPBP

- 37 million units created and intended to be distributed as follows:
  - 26 million sold at an ICO that will occur between 20/April/2018 - 20/June/2018;
  - 3 million distributed to partners who assisted in its design;
  - 2 million for the marketing and development team;
  - 4 million reserved for its issuer;
- It has 8 precision decimal places, so the smallest unit is 0.00000001 AMERI;

As AMERI was created on the Waves Platform blockchain it carries all the benefits that Waves itself has.

- Cost of sending the currency of 0.001 Waves;
- 100 transactions per minute, reaching up to 65,000 transactions per minute, since Waves-NG ([waves-ng.wavesplatform.com/](http://waves-ng.wavesplatform.com/)) was implemented;
- It has a decentralized DEX trading platform;
  - The sales orders or purchases are executed on DEX and cost 0.003 Waves;
  - AMERI currencies will be traded directly on the DEX;
  - You can buy your AMERI with: Waves, Bitcoin, Litecoin, Zcash and any other token available on DEX if you find open purchase orders;
  - During ICO you will find AMERI sales orders on the Waves Platform DEX being traded at the equivalent of US\$ 0.10 in Waves, Zcash, Litecoin or Bitcoin, calculated every day at 10:00 (GMT-3) - IT WILL BE THE OFFICIAL CHANNEL OF ICO AMERI.

## AMERI's Proposed Uses

To increase circulation and community interest in the AMERI currencies, it's intended to partner with NGOs to combat global warming and excessive energy consumption, since AMERI is eco friendly. Its transactions are supported by LPOS, within the Waves platform, reinforcing this idea and in order to make the project perennial and sustainable will be mounted a Solar Powered Node Waves, to strengthen the community, reduce the environmental impact and keep our currency in the air permanently, in conjunction with Full Node will be released access to it, through a Pool LPOS, so that users lease their Waves and we will return 95% of the rewards to users who give up their coins for leasing in our Full Node, so we can guarantee the perpetuity of our currency.

AMERI has got a social network ([ameriupstar.live](http://ameriupstar.live)) where the focus will be the promotion of investments, technologies and solutions in blockchain and cryptocurrency. With the growing censorship by some social networks about bitcoin, blockchain, ICO and cryptocurrency, this social network comes with the objective of supplying this need. Startups, technology entrepreneurs and cryptocurrency are expected to seek this social network as an alternative to their businesses, as there will be no censorship of these issues within this environment. In the same way as [ameriupstar.live](http://ameriupstar.live) will be created a WEB RADIO focused on the sector of economics and investments in cryptocurrencies, ICOs, crypto tokens and related subjects. Finally there will be a movement to set up a bill payment system with AMERI. In all these business environments, the AMERI currency will be consumed, as advertisers on the social network and on the web radio will only be able to contract advertising and / or publication services with the AMERI currency. Other forms of payment will not be accepted within the platform, in other words, it creates an internal market with a huge potential, since more and more companies are migrating their advertising funds from the traditional advertising market to digital and from the traditional economy to cryptocurrencies.

## ROADMAP

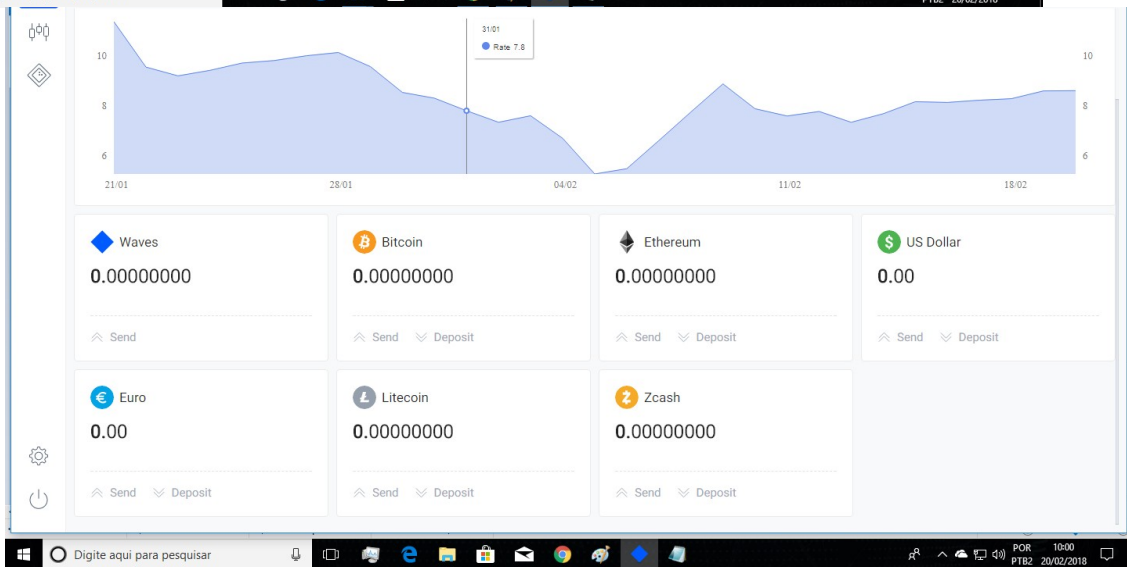

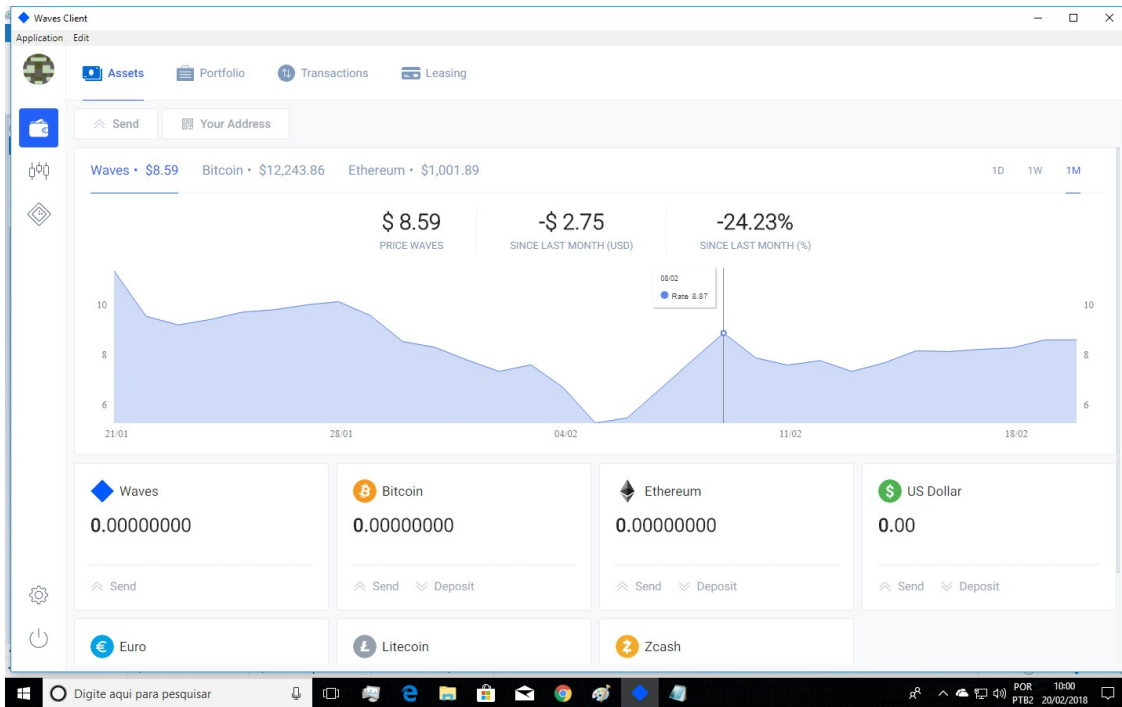

<b>Market Analysis and Scenario</b> Period of analysis and study on the opportunities and risks in the market of cryptomoedas.	2017/12/27
2018/02/23	<b>Token Creation</b> Creation of the Token on the Waves platform. Continuity of studies and maturity of the project.
<b>AmeriUpStar.live Pre-Launch</b> Pre-launch of the social network focused on business, crypto-coins, stock exchange and the like.	2018/06/05
2018/07/10	<b>ICO launch</b> This day will be the launch of ICO in Dex (Decentralized Exchange of Waves) and authorized partners.
<b>Listing in other Exchanges</b> American bit will be listed in other exchanges to facilitate currency trading among users	10/10/2018
2018/10/10	<b>End of ICO</b> Closing of the sales of the last lot of tokens at Dex.
<b>Social Networking Shield ameriupstar.live</b> Migration of ameriupstar.live social network infrastructure to own servers, to ensure greater security, confidentiality and availability to users.	2018/02/28

<p style="text-align: center;">2019/03/31</p>	<p style="text-align: center;"><b>Release of Full Node Waves</b> Beginning of Full Node Waves operations in Brazil, giving more speed and security to Waves users and guaranteeing the perpetuity of the American Bit</p>
<p style="text-align: center;"><b>Launch of Web Radio</b> Official inauguration of the web radio, which will be 24 hours a day, 7 days a week in the air with diverse schedules focused on the financial world.</p>	<p style="text-align: center;">2019/05/31</p>
<p style="text-align: center;">2019/10/31</p>	<p style="text-align: center;"><b>Payments Gateway</b> Creation and availability of a payment gateway, for payment of bills, cell phone charges, all with the American bit currency.</p>

## How to Use the Waves Platform

To purchase and transact with American Bit (AMERI) you must create, or have a Waves Platform account ([wavesplatform.com](http://wavesplatform.com)). The installation and use of the Waves Platform is very intuitive, however to include the American bit token in your shopping portfolio you must follow the following steps:

With the Waves Platform installed on your computer and your **SEED well kept**, you will have the working environment available for your trading where you can monitor the prices of your favorite cryptographic assets within the Waves Platform and some Cryptocurrencies at the payment gateway.

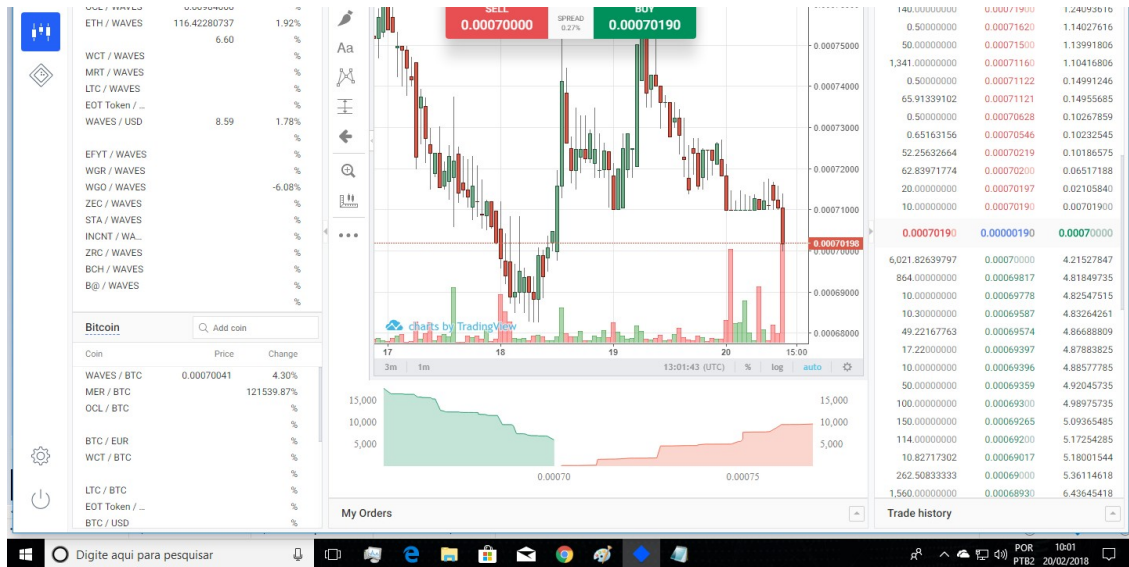

That's all! I already know the initial environment of the Waves Platform, now we are going to the DEX. To get in the DEX, which is the decentralized exchange of Waves, you must click the left in the control panel of your Waves desktop in some candles

In other words, that icon indicated with the arrow above.

Within the DEX you will have this working environment:

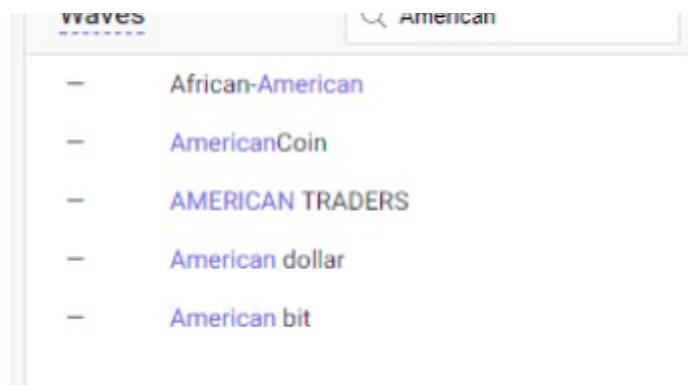

By default the chart pair that will appear will be Waves / BTC. To include American bit in your trading list you must follow the next procedure:

In the search bar in the upper right corner search for the term "American"

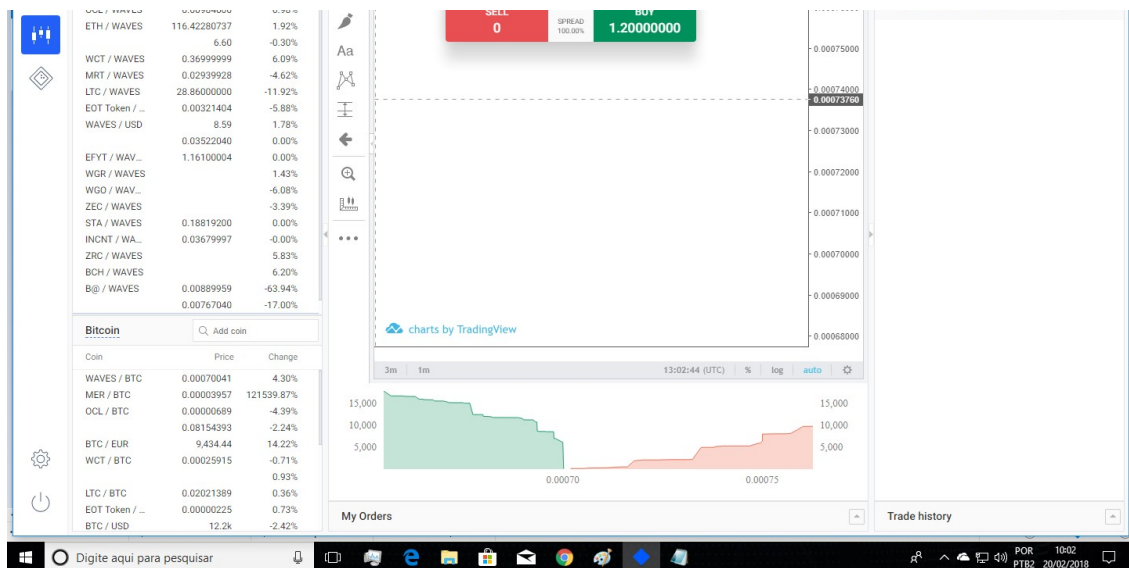

The following tokens will appear, or more, click on the word "American bit", if it doesn't appear with this simple search, search for the token ID:

B1vTbE9oAJrmdBcwwuybSDE1TmkZHCuFNNvNwiaMEPBP

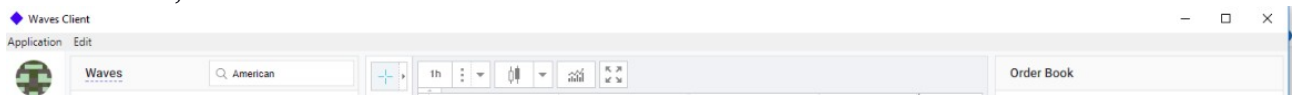

It's ready! AMERI is available for exchange by Waves

As it was said above, during ICO will be AMERI on sale in Waves, Zcash, Litecoin or Bitcoin and to exchange the pair Waves / American bit by AnyToken / American bit just click on the search again, but in this case clicking on the word Waves, on the left, that it can be replaced by AnyToken if you know the name, or by its ID and in the blank field continue searching for American bit, or its ID.

Thank you for reading this White Paper and we hope it has been useful for your decision making.  
 Regards, Team AMERI
